COSELEY URBAN DISTRICT COUNCIL.

ANNUAL REPORT

OF THE

Medical Officer of Health

FOR THE YEAR 1942.

*To the Chairman and Members of the
Coseley Urban District Council.*

GENTLEMEN,

I beg to present the following abbreviated report on the Coseley Health Services for the Year 1942. The contents are largely composed of statistical Tables as these afford a handy way of comparing the figures with those of the previous year.

The Population has been given as 30,450, and the Birth and Death Rates have been estimated at 21.57 and 9.62 respectively. The Infantile Mortality Rate was 57.83 and the Diarrhoea and Enteritis Death Rate 9.13.

I should like to return my best thanks to the Officials of the Wolverhampton and Dudley Guest Hospitals, the Staffs of the Isolation Hospitals, the Tuberculosis Dispensaries at Wolverhampton and Dudley, the County Laboratory at Stafford and the local Public Assistance Office. I am also grateful for the co-operation I have had from the Medical Practitioners in the District.

Finally, I gratefully acknowledge the efficient and loyal help given to me by my colleagues in the Health Department.

I have the honour to be,

Mr. Chairman and Gentlemen,

Your obedient Servant,

ALEXANDER J. WATT.

EXTRACTS FROM VITAL STATISTICS.

Births.

				Birthrate per 1,000 estimated population
	Total	Males	Females	
Live—Legitimate	647	350	297	21.21
Illegitimate	10	7	3	0.32
				Rate per 1,000 “ Live ” and “ Still ” Births.
Still—Legitimate	15	8	7	22.83
Illegitimate	—	—	—	—
“ Still ” Birthrate per 1,000 population—0.49				

Deaths.

Total	Males	Females	Death Rate per 1,000 estimated population.
168	125	293	9.62
			Rate per 1,000 “ Live ” and “ Still ” Births
Deaths from Puerperal Sepsis			—
“ „ Other „ Causes			—
DEATH RATE OF INFANTS UNDER ONE YEAR.			
All Infants per 1,000 Live Births			38 57.83
Legitimate Infants per 1,000 Legitimate Live Births			37 57.03
Illegitimate Infants per 1,000 Illegitimate Live Births			1 100.00
			Per 1,000 estimated population.
Deaths from Whooping Cough (all ages)			4 0.13
“ „ Diarrhoea (under 2 years)			6 0.19
Deaths and Death Rate from Pulmonary Tuberculosis			15 0.49
“ „ „ „ „ Pneumonia			30 0.98
“ „ „ „ „ Influenza			2 0.06
“ „ „ „ „ Cancer			30 0.98
“ „ „ „ „ Violence			13 0.42
“ „ „ „ „ Non-Pulmonary Tuberculosis			7 0.23

REVIEW OF VITAL STATISTICS.

An outline of the principal causes of death will be found in the statistical tables at the end of the report.

Heart Disease accounted for 51 deaths when compared with 62 deaths in 1941. Pneumonia caused 30 deaths: there were 37 in the previous year. Cancer caused 30 deaths. This number is 5 less than that recorded in 1941. There were 25 deaths from cerebral haemorrhage, and 27 in the previous year. The number of deaths from violence was 13; three less than in the previous year.

General Provision of Health Services.

A list of the officials of the Health Department will be found on page 3. There were no staff changes during the year.

Laboratory Facilities.

The following reports were obtained from the County Laboratory.

DISEASE.	RESULTS.		TOTALS.
	Negative.	Positive.	
Diphtheria	147	28	175
Tuberculosis	37	11	48

Home Nursing and Ambulance Facilities.

No change.

Clinic and Treatment Services.

All services were centred at the Bayer Hall Clinic.

Maternity Services.

ANTE-NATAL CLINIC.

First Attendances	425
Total Attendances	1,609
No. of cases referred for spécial examination	24
No. of cases admitted to Hospital	20

HEALTH VISITING.

No. of visits to children under one year :—

First Visits	579
Total Visits	2,449

No. of visits to children between one and five years :—

Total Visits	3,565
--------------	-------	-------	-------	-------	-------	-------	-------

CHILD WELFARE CENTRE.

Total Attendances at Centre during year :—

(1) By children under 1 year of age	5,414
(2) By children 1—5 years of age	548

Total number of children who attended at the Centre for the first time during the year, and who, on the date of their first attendance were :—

(1) Under 1 year of age	379
Percentage of notified births	57.68
(2) Between the ages of 1 and 5 years	29

Total number of children who attended at the Centre during the year, and who, at the end of the year were :—

Under 1 year of age	339
Between 1 and 5 years	377

As in the previous year the Ante-Natal Clinic was conducted by Dr. Nagle, Registrar, Women's Hospital, Wolverhampton, and the Medical Officer of Health carried out the consultations at the Child Welfare Centre.

Dental Treatment.

Expectant, Nursing Mothers and Children under the age of 5 obtained treatment as outlined below.

	Women.	Children.	Total.
No. recommended for treatment	73	31	104
No. who attended for treatment	25	27	52
Percentage of acceptances	35.61	87.09	50
Number of extractions under local Anaesthesia	28	1	29
Number of extractions under Gas Anaesthesia	20	20	40
Number of fillings	—	—	—
Number of dressings	—	64	64

Voluntary Workers.

Our best thanks are due to the ladies who so ably assisted us at the Ante-Natal and Child Welfare Clinics during the year. We could not have provided so much service without their help.

Water Supply and Drainage.

No change to note.

PUBLIC CLEANSING.

This part of the work was carried out by Mr. Toon, Cleansing Superintendent who also acted as Salvage Officer.

THE
ANNUAL REPORT

OF THE
Chief Sanitary Inspector.

FOR THE YEAR 1942.

*To the Chairman and Members
of the Health Committee.
Coseley Urban District Council.*

GENTLEMEN,

I beg to submit my report on the sanitary administration of the District for the year 1942. In compliance with the instructions from the Ministry of Health the report has been curtailed.

Inspections.

The total number of visits paid of all types was 4,321. The visits made in connection with the following-up of notices and works-in-progress numbered 1,288.

Complaints.

The total number of complaints of all kinds received during the year was 441 as against 305 in 1941.

Notices.

Three hundred and twenty-five "Informal," Ninety-five "Abatement" and forty-four for the "Provision of Ashbins" were served during the year.

SUMMARY OF INSPECTIONS.

The types of visits are as follows :—

Accumulations	32
Bakehouses	98
Butcher's Premises	275
Complaints	441
Cowsheds	146
Drainage	281
Factories	135
Fried Fish Shops	320
Houses Disinfected	134
Houses Disinfested	7
Infectious Diseases	276
Moveable Dwellings	272
Offensive Trades	48
Overcrowding (revisits)	561
Outworkers Premises	33
Other Food Premises	97
Pigkeeping	197
Post War Housing	247
Refuse Receptacles	74
Rodent Control	191
Slaughterhouses	145
Slaughter on Private Premises	98
School Disinfection and Inspections	259
Smoke Observations	8
Stables	21
Verminous and Dirty Premises	129
Works Ordered	1,139
Works in Progress	149
Various A.R.P. Visits	478
Miscellaneous Visits	314
Total						5,609

INSPECTION AND SUPERVISION OF MEAT AND OTHER FOODS.

During the year 145 visits were paid to Gill's Bacon Factory, Parkfield Road, and 98 to private premises on the occasion of pig slaughter.

The number of pigs slaughtered and inspected at the Bacon factory were 1,439 and 150 on private premises, making a total in all of 1,589.

The amount of meat condemned from this source was:—
 Nine pig carcasses, weighing approximately 15 cwts, 88 lbs., and offals, weighing approximately 25 cwts, 41 lbs, making a total of 2 tons 17 lbs, mostly affected with Tuberculosis.

CONDEMNED CANNED FOODS.

	Jan. to March	Apl. to June	July to Sept.	Oct. to Dec.	Totals
Baked Beans	—	1	3	2	6
Bartlett Pears	—	—	1	—	1
Chopped Ham	—	1	5	—	6
Condensed Milk	—	5	1	8	14
Dried Carrots	—	—	3	—	3
Green Peas	—	1	5	—	6

Meat Roll	—	—	—	13	13
Totals	21	32	104	58	215

OTHER FOOD STUFFS.

	Jan. to March	April to June	July to Sept.	Oct. to Dec.	Total Weights, etc.
Bacon & Ham	—	3 lbs.	39 $\frac{3}{4}$ lbs.	27 $\frac{1}{4}$ lbs.	70 lbs.
Butter	—	24 lbs.	—	—	24 lbs.
Cheese	—	—	102 lbs.	—	102 lbs.
Dried Prunes	—	—	27 lbs.	—	27 lbs.
Eggs	246	683	132	84	1,145
Verona Sticks	—	—	72	—	72

Offensive Trades.

There is only one of these establishments in the district, this is kept in a clean condition and visited regularly.

Fish Frying Premises.

320 visits were made to these premises during the year for the purpose of inspection of the foods and cleanliness.

Interviews.

The number of personal interviews with Owners and Tenants, Builders, etc., during the year was 288, one can easily visualise the time taken by these, but they are a necessary requirement of the Department.

Rats & Mice Destruction Act.

191 visits were made to premises due to complaints about these vermin, and the necessary information tendered.

I am, Mr. Chairman and Gentlemen,

Your obedient Servant,

G. H. PARKES,

Chief Sanitary Inspector.

HOUSING.

Slum Clearance and Overcrowding.

Owing to lack of repairs and the difficulty of obtaining adequate routine maintenance the number of unfit houses has increased, and overcrowding has become worse. This problem will have to be tackled energetically as soon as possible. The houses represented as unfit in 1938 and early in 1939 are in some cases in a state of disintegration.

Inspection and Supervision of Food.

Inspection of Cowsheds, Milkshops etc., was carried out as outlined in the Report of the Chief Sanitary Inspector.

Infectious Diseases.

Notifications.

Pneumonia	90	(81)
Scarlet Fever	86	(63)
Erysipelas	11	(13)
Diphtheria	48	(91)
Puerperal Pyrexia	1	(2)
Ophthalmia Neonatorum	2	(3)
Enteric Fever	0	(0)

The figures in brackets represent the notifications for 1941.

For particulars of Hospital Treatment see Table VII on Page 21.

Immunisation against Diphtheria.

The figures are given on page 34 of the attached report of the School Medical Officer.

Puerperal Pyrexia.

One case was notified. The patient was treated at home and recovered.

The Hospital treatment of Infectious Disease cost £1,434-14-0.

Scabies.

The reader is referred to page 31 of the attached report of the School Medical Officer where there is a note on the prevalence of this condition and the treatment provided.

Tuberculosis.

Thirty-two cases were notified and there were 22 deaths.

NOTIFICATIONS.

Year.	Male.	Female.	Total.
1942	15	17	32
1941	26	23	49
1940	20	11	31
1939	21	19	40
1938	22	23	45

The interval between notification and death in the fatal cases is given below.

Year.	Within one month	From 1-3 mths.	From 3-6 mths.	From 6-12 mths.	From 1-2 yrs.	From 2-3 yrs.	From 4 yrs. and upwards.	Notified after death.	Total.
1942	3	1	2	1	5	1	2	7	22

Our Health Visitors made 26 first visits and 963 re-visits to tuberculosis cases during the year.

COSELEY URBAN DISTRICT COUNCIL.

EDUCATION COMMITTEE.

ANNUAL REPORT

OF THE

School Medical Officer

FOR THE YEAR 1942.

*To the Chairman and Members of the
Coseley Education Committee.*

LADIES AND GENTLEMEN,

The following is a brief report on the work of the School Medical Service for the year 1942.

During the year it was possible to give more time to the inspection of children in the Routine Groups, and altogether 1,254 were examined. In addition 701 children were seen at Revise and Special inspections in the Schools.

The work of the Ophthalmic Clinic was kept well up-to-date by Mr. Campbell Orr the Ophthalmic Surgeon and the figures for the cases seen are given in Table A.

Table B. gives a summary of the attendances at the Bayer Hall Minor Ailments Clinic and an outline of the conditions for which treatment was provided.

Particulars of the work at the Dental Clinic are given in Table D. and it will be seen that in spite of the pressure of other duties the Dental Surgeons were able to inspect a total of 1,161 children in the schools, and that 661 of the 962 children who required treatment received attention during the year.

Brief notes on other aspects of the Service will be found within the report and therefore in conclusion I should like to express my warm appreciation of the help I have had from the Teachers and Officials of other Departments, and to acknowledge the loyal and efficient assistance given to me by all the Staff of the School Medical and Dental Departments.

I remain,

Ladies and Gentlemen,

Your obedient servant,

ALEXANDER J. WATT.

Staff.

The School Medical Staff is as follows :—

School Medical Officer and Medical Officer of Health :

ALEXANDER J. WATT, M.B., B.Ch., B.A.O., D.P.H.

Ophthalmic Surgeon—Part-time :

H. CAMPBELL ORR, M.B., Ch.B., F.R.F.P.S.

School Dentists—Part-time :

W. G. WEBSTER, L.D.S., Eng.	}
C. H. MERRY, L.D.S., B'ham.	
B. H. MOORE, L.D.S., B'ham.	

School Nurses :

MISS M. T. RUSSELL.

MISS M. M. FARRELL, S.R.N., R.F.N., S.C.M.

Senior Clerk and Dental Attendant :

MISS A. J. FLAVELL.

Junior Clerk :

MISS I. BARNETT.

Principal Statistics.

Number of Departments under the Coseley Education Authority.

There are 10 Blocks of Schools comprising 17 Departments.

Voluntary Schools included in the above.

Infants 3, Junior 2.

Accommodation.

Provided Schools 3,891. Non-Provided 1,006. Total 4,897.

Number of Children on School Registers on March 31st. 1942.

4122.1.

*Total Accommodation :—*Infants 1,467, Juniors 1,510, Juniors and Infants combined 2,977, Senior 1,920. Total 4,897.

Medical Inspection.

Routine.

The figures for these routine inspections are as follows :—

	Age.	Number.
" Entrants "	(5—6)	620
" Intermediates "	(8—9)	361
" Leavers "	(12—13)	273
		<hr/>
		1,254
Other Routine Inspections	—
		<hr/>
Total	1,254
		<hr/>

No. Special and Re-inspections (Various Ages) 701

Findings.

Treatment was required in 127 routine cases and 161 children were placed under observation. The following is a summary of the conditions for which treatment was recommended :—

Defective Vision	14
External Eye Disease	4
Defective Nutrition	15
Dental Caries and Sepsis	45
Chronic Tonsils and Adenoids	9
Other Nose and Throat Conditions	2
Otitis Media	3
Bronchial Catarrh	13
Skin Diseases	23
Other Conditions	19
Squint	5
Defective Hearing	2
Chronic Tonsils	2

Nutrition.

The nutritional condition of the 1,254 children examined in the Routine Groups is analysed in Table II which will be found at the end of the report and the figures compare favourably with those recorded in this District since 1938. No case of bad nutrition was found, and the figure of 6.22% for the slightly subnormal group was low.

Visual Defects.

TABLE A.
Ophthalmic Clinic.

No. of Eye Sessions	25
No. of Refractions carried out	179
No. of Glasses Prescribed	157
No. of Re-attendances	164
Total Attendances	343

Nose and Throat Defects.

In my previous reports I drew attention to the need of an arrangement with the local Hospitals for the operative treatment of nose and throat defects. It is not anticipated that the provision would be required for a large number of cases, but it would be a great help to those children who require urgent treatment.

Uncleanliness.

Particulars will be found in Table 5 at end of report. The Nurses were able to make an average of three routine visits to each school during the year and the re-visits were also proportionally extended.

Scabies.

There was a marked increase in the incidence of this condition, and amongst the school children 225 cases came to our notice. The disease was prevalent outside the ranks of the school children and of course less easy to discover.

Only 34 cases in adults and 55 in pre-school children came to our notice. Many cases must have remained undiscovered, but few amongst the school children escaped attention.

Treatment was provided at the Civil Defence Cleansing Annexe at Bayer Hall Clinic, and consisted in baths and the application of Benzyl Benzoate Cream. The results were always satisfactory. There were some recurrences but these were due to inadequate precautions at home and sometimes to the existence of an undiscovered case in the family.

Minor Ailments.

Table B. gives details of the work carried out at the Bayer Hall Clinic.

TABLE B.

	Boys.	Girls.	Total.

Following Up Work.

The following is an outline of the work carried out by the School Nurses.

Visits to Schools for " Medical Inspections "	138
Other Visits to Schools	192
Domiciliary Visits	504
Minor Ailments Clinic	154
Dental Clinic	16
Ophthalmic Clinic Sessions	24

Arrangements for Treatment.

Treatment was provided at the Royal Hospital, Wolverhampton, the Guest Hospital, Dudley, and the Tuberculosis Dispensaries at Dudley and Wolverhampton. Our best thanks are due to the Officials of these Institutions for the willing help they gave during the year.

Infectious Diseases.

The figures are given in Tables E. and F.

Diphtheria Immunisation.

This treatment was continued at the weekly Immunisation Clinic held each Wednesday at Bayer Hall, and 662 school children were immunised. In addition 34 school children were treated outside the Clinic by private Practitioners.

609 pre-school children were immunised at the Clinic and 17 privately. These figures give totals of 696 school and 626 pre-school children, or 1,322 altogether. It was estimated that 30.75% of the children under 5 years and 32% of those aged 5 to 15 were immunised at the end of the year.

Physical Training.

I wish to thank the Organisers for their very interesting report, the principal points of which are outlined below.

Annual General Report on Physical Training 1942-1943.

This, our fourth War-time Annual Report, indicates little change in the general conditions outlined in that of 1941-2.

School Attendance has been practically unaffected by enemy air activity ; therefore, continuity of training should have been maintained.

Clothing and footwear problems, which have increased and have caused grave concern, are undoubtedly producing serious limitations upon the scheme of training considered necessary for the child's physical education.

Difficulties of this character are inevitable in the present period of National Emergency. Whilst greater issues must necessarily receive prior consideration, no chance presented by the Board of Trade and the Board of Education to alleviate such conditions should be allowed to pass unheeded.

Staffing difficulties including shortage of personnel, numerous changes and appointment of teachers unacquainted with modern teaching methods, are being combatted as far as possible.

The holding of Teachers' Training Courses by the Organisers has proved extremely difficult, as few people now have time available in which to attend. Our considered policy, therefore, has been to give as much insight as possible into modern developments of the work, by taking frequent demonstration lessons with the teachers' own classes. This has produced encouraging results.

Great emphasis is being laid on Physical Training as part of war-time organisations, and it is hoped that the recognition of its importance for physical developments and all-round training in this time of emergency will continue when the sweeping educational reforms, envisaged for the post-war era, are implemented.

Equipment.

The position forecast in our last year's report has materialised.

The replenishing of stocks by Educational Authorities had been made possible only through the combined action of the Board of Education and the Board of Trade, who, in August last requested all Education Authorities to submit an estimate of their requirements for twelve months. A proportional allocation has since been made from available stocks, and Coseley has placed orders to the full extent of this allocation.

Footwear.

Following a similar procedure it was possible to obtain supplies of plimsolls "to remain the property of the Education Authority" for use in schools, Evening Institutes and Youth Clubs.

Advantage was not taken of this opportunity. Plimsolls are now unobtainable by any other method, and considering how essential they are for correct performance of most branches of Physical Education, it is hoped that any allocation obtainable will be applied for in the future.

Playgrounds.

We append the following notes on the condition of play grounds :—

BROAD LANES SENIOR AND INFANT SCHOOLS.

Re-surfacing required, condition dangerous.

ST. MARY'S JUNIOR SCHOOL.

Surface totally unfit for Physical Training.

MANOR SCHOOLS.

Boys—Drainage inadequate.

Girls—Encroachment on available space by the dumping of air-raid shelter bunks.

LANESFIELD JUNIOR SCHOOL.

Removal of dividing walls in playground would greatly improve playground facilities.

Where fuel is stored in playgrounds, it is advocated that a temporary containing barrier be employed to prevent the coke from littering the playground.

TRAINING COURSES.

Women and Girls.

Two teachers attended regularly a physical training course introducing a syllabus of work for Senior school girls, held in the gymnasium at Stonefield Senior Girls' School, Bilston during the Autumn term.

Two teachers attended a ten week "Advanced Keep-fit" Course, run in collaboration with the Organisers, by the Central Council of Recreative Physical Training, in Dudley.

Several Youth Club members attended a twenty week Junior Leaders Course run by the Central Council of Recreative Physical Training, in Dudley.

MOUNT PLEASANT EVENING INSTITUTE.

Boys. A recreative physical training class for boys was held weekly under the leadership of Mr. Bradley, and later that of Mr. Gowland, but was disbanded owing to lack of support.

Girls. A successful "Keep-fit" class for women and girls was run by Miss D. G. Williams.

In concluding this very short report, we should like to express our appreciation of the continued support given to us in our work in the area by all sections of the Educational Services concerned with Physical Training.

(Signed) E. A. WHITE.

G. HEYHOE.

Organisers of Physical Training.

Mental Deficiency.

Miss Tosh, the County Mental Welfare Officer has kindly contributed the following report:—

Report on work carried out for Coseley Education Committee during the year 1942.

I have pleasure in reporting that the work of supervising in their homes those children classified as educable in special schools, in Coseley, has been continued during 1942.

In all there have been 18 children on the Association's list during the year, of these 10 are classified as educable, and four have been notified to the County Council as ineducable in a special school, two children have been in residential special schools during 1942. One boy reached the age of 16 years during 1942 and has been added to the list for voluntary supervision. 80 domiciliary visits have been paid and 28 interviews arranged on behalf of the children's welfare.

Contact with the homes of feeble-minded children through the visits of a trained social worker has proved more than ever valuable during the war period. Every child who is backward presents a problem in some degree to his parents, and the Visitor can do a great deal in many cases through discussion and advice

to help parents to solve behaviour difficulties with these children, which may arise simply from a lack of understanding of the child's mentality and capacity. By adjusting such difficulties a greater measure of usefulness and content often results in the child's life at home, at school and in his community relationships. Supervision has been made difficult by the employment of so many mothers in industry, with the result that children are often inadequately supervised after school hours.

The year has been marked by the temporary services in the area of a visiting educational psychologist from the Central Association for Mental Welfare; through the testing of individual children which she carried out, proof was given of the value of such service in ascertaining the varied groups of children in school according to their intelligence. In the case of each child tested the psychologist's diagnosis of the likely cause of backwardness or difficult conduct was valuable and enlightening to teachers, and her recommendations for individual treatment resulted in constructive action.

A course of lectures on the teaching of backward children was given by the psychologist to which all teachers in Coseley were invited.

For those children who are notified to the County Council, training is provided at Innisfallen, Bradley, by the County Council, and we have been very glad to welcome visitors from Coseley to the Centre to see the methods of training being carried out there by Miss Chettle and her staff.

It has never been easier than it is at the present time for defective children of all grades to obtain employment. We have done our best to advise parents to act wisely in placing their feeble-minded children in suitable employment and to train them to save some of their earnings.

We would like to express our appreciation of the ready way on which the Coseley Education Committee has co-operated with the Association in all efforts to promote the welfare of the children under supervision.

(Signed) F. H. TOSH,
Secretary,
Staffordshire Association for
Mental Welfare.

Blind and Deaf Children.

Two Blind and three deaf children were in Special Schools.

Conclusion.

We have had valuable assistance from the Teachers and other Officers of the Education Committee, and on behalf of the School Medical and Dental Departments I wish to return our best thanks.
